Policy 2.00	Account Management	Information Services	-Author

Introduction

Computer accounts are the means used to grant access to TSSWCB Information Resources. These accounts provide a means of providing accountability, a key to any computer security program, for Information Resources usage. This means that creating, controlling, and monitoring all computer accounts is extremely important to an overall security program.

Purpose

The purpose of the TSSWCB Account Management Security Policy is to establish the rules for the creation, monitoring, control and removal of user accounts.

Audience

The TSSWCB Account Management Security Policy applies equally to all individuals with authorized access to any TSSWCB Information Resources.

Definitions

Information Resources (IR): any and all computer printouts, online display devices, magnetic storage media, and all computer-related activities involving any device capable of receiving email, browsing Web sites, or otherwise capable of receiving, storing, managing, or transmitting electronic data including, but not limited to, mainframes, servers, personal computers, notebook computers, hand-held computers, personal digital assistant (PDA), pagers, distributed processing systems, network attached and computer controlled medical and laboratory equipment (i.e. embedded technology), telecommunication resources, network environments, telephones, fax machines, printers and service bureaus. Additionally, it is the procedures, equipment, facilities, software, and data that are designed, built, operated, and maintained to create, collect, record, process, store, retrieve, display, and transmit information.

Information Resources Manager (IRM): Responsible to the State of Texas for management of the agency's information resources. The designation of an agency information resources manager is intended to establish clear accountability for setting policy for information resources management activities, provide for greater coordination of the state agency's information activities, and ensure greater visibility of such activities within and between state agencies. The IRM has been given the authority and the accountability by the State of Texas to implement Security Policies, Procedures, Practice Standards, and Guidelines to protect the Information Resources of the agency. If an agency does not designate an IRM, the title defaults to the agency's Executive Director, and the Executive Director is responsible for adhering to the duties and requirements of an IRM.

Definitions, continued Information Security Officer (ISO): Responsible to the executive management for administering the information security function within the agency. The ISO is the agency's internal and external point of contact for all information security matters.

> Security Administrator: The person charged with monitoring and implementing security controls and procedures for a system. Whereas each agency will have one Information Security Officer, technical management may designate a number of security administrators.

> System Administrator: Person responsible for the effective operation and maintenance of Information Resources, including implementation of standard procedures and controls to enforce an organization's security policy.

Account Management • Policy

- All accounts created must have an associated request and approval that is appropriate for the TSSWCB system or service.
- All users must sign the TSSWCB Information Resources Security Acknowledgement agreement before access is given to an account.
- All accounts must be uniquely identifiable using the assigned user name.
- All default passwords for accounts must be constructed in accordance with the TSSWCB Password Policy.
- All accounts must have a password expiration that complies with the TSSWCB Password Policy.
- Accounts of individuals on extended leave (more than 30 days) will be disabled.
- All new user accounts that have not been accessed within 30 days of creation will be disabled.
- System Administrators or other designated staff:
 - are responsible for removing the accounts of individuals that change roles within the TSSWCB or are separated from their relationship with the TSSWCB
 - must have a documented process to modify a user account to accommodate situations such as name changes, accounting changes and permission changes
 - must have a documented process for periodically reviewing existing accounts for validity
 - are subject to independent audit review
 - must provide a list of accounts for the systems they administer when requested by authorized TSSWCB management
 - must cooperate with authorized TSSWCB management investigating security incidents

Disciplinary Actions

Violation of this policy may result in disciplinary action which may include termination for employees and temporaries; a termination of employment relations in the case of contractors or consultants; dismissal for interns and volunteers; or suspension or expulsion in the case of a student. Additionally, individuals are subject to loss of TSSWCB Information Resources access privileges, civil, and criminal prosecution.

Supporting Information

This Security Policy is supported by the following Security Policy Standards.

Reference

Policy Standard detail

1 IR Security controls must not be bypassed or disabled.

Security awareness of personnel must be continually emphasized, reinforced, updated and validated.

All personnel are responsible for managing their use of IR and are accountable for their actions relating to IR security. Personnel are also equally responsible for reporting any suspected or confirmed violations of this policy to the appropriate management.

Passwords, Personal Identification Numbers (PIN), Security Tokens (i.e. Smartcard), and other computer systems security procedures and devices shall be protected by the individual user from use by, or disclosure to, any other individual or organization. All security violations shall be reported to the custodian or owner department management.

Access to, change to, and use of IR must be strictly secured. Information access authority for each user must be reviewed on a regular basis, as well as each job status change such as: a transfer, promotion, demotion, or termination of service.

The use of IR must be for officially authorized business purposes only. There is no guarantee of personal privacy or access to tools such as, but not limited to; email, Web browsing, and other electronic discussion tools. The use of these electronic communications tools may be monitored to fulfill complaint or investigation requirements. Departments responsible for the custody and operation of computers (custodian departments) shall be responsible for proper authorization of IR utilization, the establishment of effective use, and reporting of performance to management.

Any data used in an IR system must be kept confidential and secure by the user. The fact that the data may be stored electronically does not change the requirement to keep the information confidential and secure. Rather, the type of information or the information itself is the basis for determining whether the data must be kept confidential and secure. Furthermore if this data is stored in a paper or electronic format, or if the data is copied, printed, or electronically transmitted the data must still be protected as confidential and secured.

Supporting Information, continued	This Security Policy is support Standards.	ed by the following Securit	y Policy
Reference #	Policy Standard detail		
9	On termination of the relationship with the agency users must surrender all property and IR managed by the agency. All security policies for IR apply to and remain in force in the event of a terminated relationship until such surrender is made. Further, this policy survives the terminated relationship.		
16	Custodian departments must provide adequate access controls in order to monitor systems to protect data and programs from misuse in accordance with the needs defined by owner departments. Access must be properly documented, authorized and controlled.		
17	All departments must carefully assess the risk of unauthorized alteration unauthorized disclosure, or loss of the data for which they are responsible an ensure, through the use of monitoring systems, that the agency is protecte from damage, monetary or otherwise. Owner and custodian departments must have appropriate backup and contingency plans for disaster recovery based or risk assessment and business requirements.
